

HAMACHI

FINANCE

The Rewards Token that Diversifies Your Portfolio for you

01.

Introduction

Hamachi Finance (\$HAMI) was created in January 2023 and launched on the Arbitrum Network, kicking off Arbitrum season with a rewards token that is based on trade volume.

Rewards go directly to \$HAMI holders in the form of the current Reward Token being farmed.

Hamachi Finance is 'Community Meme-Fi', which has the fun of a meme token, but more importantly a reward mechanism to strengthen the Hamachi community's value proposition.

We are also bringing mass exposure (Token Buys, # Unique Holder wallets, and more) to other Arbitrum projects. The vision of Hamachi is to be the token to accumulate and farm other tokens on the Arbitrum Network and eventually going Cross-Chain / Multi-Chain.

Simply buy and Hold \$HAMI and earn rewards.

02.

Disclaimer

The information and resources in this white paper pertaining to Hamachi Finance are not intended as, and shall not be understood or construed as financial advice. The Hamachi Finance team, to the best of its abilities, have ensured that all the information and resources are accurate.

Hamachi Finance is not an investment vehicle, it is a community meme-fi token that reflects rewards back to the Hamachi community. Nothing available on or through the Hamachi Finance White paper should be understood as financial advice. Anything in this white paper can and will be updated at any time to meet the requirements or challenges that real-world or investment-based aspects may impose.

Cryptocurrency can be extremely volatile, we cannot and will not be held responsible for any losses incurred from any purchase Hamachi Finance \$HAMI and/or partner related. It is in your own best interests to seek professional financial advice. 1 \$HAMI = 1 \$HAMI.

Hamachi Finance Contract:

0x02150e97271fdc0d6e3a16d9094a0948266f07dd

04.

Use Case

Hamachi Finance (\$HAMI) is a meme token with Defi Tokenomics, hence Meme-fi.

Hamachi Finance allows holders to diversify their cryptocurrency portfolio by simply buying and holding \$HAMI. This is done through our Hamachi Code (Contract) that automatically distributes rewards to \$HAMI holders with reflection mechanics to sustain the longevity of the Hamachi Finance protocol and Hamachi Community. We put the community at the forefront.

Hamachi Finance can provide rewards of any ERC20 that are distributed back to holders based on \$HAMI held (weighted distribution). The more you hold the more you get back in rewards. Our philosophy is to help cryptocurrency enthusiasts to diversify their portfolios and to choose top candidates as the Reward Token being farmed and distributed.

There is more information on the selection of the reward token in the reward token section.

05.

Problem & Solution

Hamachi Finance identified a missing component in the Arbitrum ecosystem. A token that can diversify portfolios and aid cryptocurrency enthusiasts to learn more about and gain more exposure to other projects.

We all know cryptocurrency is extremely volatile. So by building a project that automatically creates a diverse portfolio, users are getting their risk spread by design.

These projects are well vetted by the Hamachi Finance analyst team alongside valued members of the HAMI community.

We identified this universal need for diverse portfolio building across various chains and are planning to expand cross-chain and multi-chain in the future.

06.

Reward Token

Hamachi Finance Protocol operates as a Meme-Fi token with reward token mechanics. Each buy and sell is taxed 7% which is used to farm the reward token and then distribute it to \$HAMI holders.

Daily rewards fluctuate as the contract is based on daily volume. Reward Tokens that have been farmed thus far: \$JONES and \$RDNT, picked by the team of Hamachi Finance Crypto Analysts.

We research projects that look like potential candidates with room to grow and expand in the upcoming cycles. The Hamachi community will also have a means to discuss and vote on which reward token to switch to next. Projects will all undergo research and analysis to make sure the reward token candidates are legitimate.

07.

Community Involvement

Want to get more involved?

Hamachi Finance is always looking and receptive to feedback from the community. For rewards token decisions, we will move to a future community vote and votes will be weighted by # of \$SHAMI tokens held per wallet. In addition to plans to go Multi-Chain, we will also be opening up votes for tokens cross-chain for the Hamachi Community to vote on.

08.

Yields and Defi

*Hamachi Finance
is the birth of
Meme-Fi and Rewards
Token Distribution on
Arbitrum Network.*

The first-of-a-kind protocol on Arbitrum a Yield is based on token volume, however, Hamachi Finance plans to explore future yield mechanics and additional Defi mechanics to provide additional yields. As the Hamachi Finance protocol grows, so does the opportunity to launch on multiple chains and explore more routes to add value back to the Hamachi Finance Community.

09.

Multi Chain:

The Hamachi Finance team chose Arbitrum to launch its initial protocol due to the growing DEFI ecosystem and inexpensive gas fees.

Over the last year, the Arbitrum Network has built a layer on top of ETH Mainnet and it has grown exponentially in the number of users and TVL on the Arbitrum Chain.

As the Hamachi Finance Protocol grows, we are looking to expand Cross-Chain and Multi-Chain to grow and diversify Hamachi holders' portfolios, bringing mass exposure to both the Community and the projects on other chains. In that sense we view the relationship between Hamachi Finance and the projects it is farming as reflexive and mutually beneficial.

We are currently looking at Polygon, BSC, and all EVM-compatible chains that show exponential growth potential.

Chains that have

1. Growing Userbase
2. Increasing TVL
3. Inexpensive Gas Fees
4. Fast TX speed
5. Security
